

Raffy,

A cancer diagnosis changes everything. During the course of treatment and after care, a pediatric cancer patient has their physical, emotional, and psychosocial health tested time and again. Because kids with cancer have complex needs, POGO has created an equally diverse group of services that meet these unique needs. POGO's many donors help us make kids healthier and happier every day.

The contribution Elite Design Concrete made to Rockin for POGO helped us make a huge impact. About 4,000 families are currently going through active treatment or follow up care in Ontario, and many of them are accessing our financial assistance program for the unexpected out-of-pocket costs associated with a childhood cancer diagnosis. Survivors that face learning challenges as a result of their disease and/or treatment are moving on to college or university with the help of POGO counsellors. And POGO research is asking the types of questions that will benefit these young cancer patients, their families and survivors in Ontario and around the world.

Thank you for sponsoring Rockin For POGO. Your support support is helping the kids in Ontario with cancer receive the best prospects for survival and an optimal quality of life.

Thank you from everyone at POGO !!

Charlene Wexler
